## **Preface**

The essence of the UP Institute for Small-Scale Industries (ISSI) Library is to provide access to all sources of information relating to Philippine micro, small, and medium enterprises (MSMEs). To realize this, effective and efficient research tools and guides are devised to facilitate information retrieval. One of the services that is geared towards a high level of client satisfaction is indexing. With the rapid increase in the amount of published information on MSMEs, library clients need quality information from reliable sources more than quantity from a list of search results found on the internet.

Hence, the Index to Philippine MSME Online News Sources (IPMONS) is devised annually by the ISSI Library to enhance its provision of access to information from different sources and organizations. This tool, which serves as a guide to researchers, provides an extensive collection of online news articles concerning MSMEs in the country.

This guide focuses on reliable local online news sources for entrepreneurial research. The fourth volume of the IPMONS covers 40 online news sources, which are carefully selected and determined to be authoritative. It comprises 1,097 published articles from online news sites in 2024. The news articles are classified into 59 subject headings using authoritative controlled vocabularies and the Philippine Standard Industrial Classification (PSIC) of the Philippine Statistics Authority (PSA).

The Index is intended for policy researchers, entrepreneurs, students, and the general public interested in the intricacies of MSMEs' growth in the country.
