## Preface

At the forefront of supporting Philippine micro, small, and medium enterprises (MSMEs), the UP Institute for Small-Scale Industries (ISSI) Library is dedicated to ensuring comprehensive and reliable access to essential information. To achieve this, the library develops effective research tools and guides that facilitate efficient information retrieval. Indexing is one of the key services designed to enhance client satisfaction. Given the rapid growth in published information on MSMEs, library clients increasingly require high-quality information from reliable sources rather than large quantities of unfiltered search results available online.

Accordingly, the ISSI Library annually develops the Index to Philippine MSME Online News Sources (IPMONS) to improve access to information from diverse sources and organizations. This tool serves as a comprehensive guide for researchers by offering an extensive collection of online news articles related to micro, small, and medium enterprises (MSMEs) in the Philippines.

This guide focuses on reliable local online news sources for entrepreneurial research. The third volume of IPMONS encompasses 46 carefully selected and authoritative online news sources. It comprises 1, 479 published articles from online news sites in 2025. The news articles are classified into 57 subject headings using authoritative controlled vocabularies and the Philippine Standard Industrial Classification (PSIC) of the Philippine Statistics Authority (PSA).

The Index is intended to support policy researchers, entrepreneurs, students, and the general public interested in the complexities of MSME growth in the Philippines.

## List of Online News Sources

## Table of Contents

IPM 001 Agricultural industries ..... 2
IPM 002 Artificial intelligence--Industrial applications ..... 2
IPM 003 Banks and banking ..... 3
